

Our Institute

The Research Institute of Molecular Pathology (IMP) in Vienna pursues world-class research in basic molecular biology. It is located at the Vienna BioCenter and largely sponsored by Boehringer Ingelheim. With over 250 scientists from 40 countries, the IMP is committed to scientific discovery of fundamental molecular and cellular mechanisms underlying complex biological phenomena.

Research Technician (m/f/d) – Full Time

Your Tasks

We are looking for a full-time research technician to provide support for the laboratory of Clemens Plaschka. The lab's research focuses on RNA biology and uses biochemical, structural, and functional methods to study mRNA regulation. The main responsibilities for this position will be:

1. Molecular biology techniques, including DNA cloning, protein expression, and protein purification.
2. Mammalian cell culture at various scales (from plates to spinner flasks).
3. General lab support (making stock solutions, ordering consumables).

Your Profile

Successful applicants should have a strong background and experience in molecular biology. Working experience with mammalian cells is a plus. He or she should be friendly, interactive, well-organized, highly motivated, and excited to learn new methods. An ability to work as a team and good English communication skills are essential.

Our Offer

IMP is an inclusive and equal opportunity employer. We offer a young, dynamic, international work environment in an international research group and an opportunity to make important contributions to basic biomedical research. The initial appointment is for 2 years, with the potential for renewal. The full-time monthly gross salary starts from € 2,900 (14x per year), depending on qualification and experience.

Apply Now

Contact

Applications, including a letter of motivation describing the reason of your interest in this position and past research experiences, a CV and the names and contact details of two referees should only be made online by 1st of October 2025.

We look forward to your application!
